# Onboarding Like You Have Never Seen It

## Your Onboarding Team Will:

- Simplify the onboarding process
- Organize and import your information for you so you can concentrate on what you do best
- Be there with you every step of the way to answer your questions and give you whatever guidance you need
- Provide the technical expertise you need
- Take the worry and stress out of onboarding
- Create a stepped onboarding plan with you that will be both smooth and painless
- Help you understand the onboarding process in simple layman's terms
- Set the new standard for a simple onboarding experience

## The Problem

We have all heard stories about bad onboarding experiences. The truth is that other companies focus so hard on creating their tools, that they never consider the customer experience and it shows.

You can't afford to shut down your business for weeks or months to implement new tools, no matter how good those tools may be. Nobody was really satisfied with the situation, but there weren't any better options.

Until now.

## Our Solution

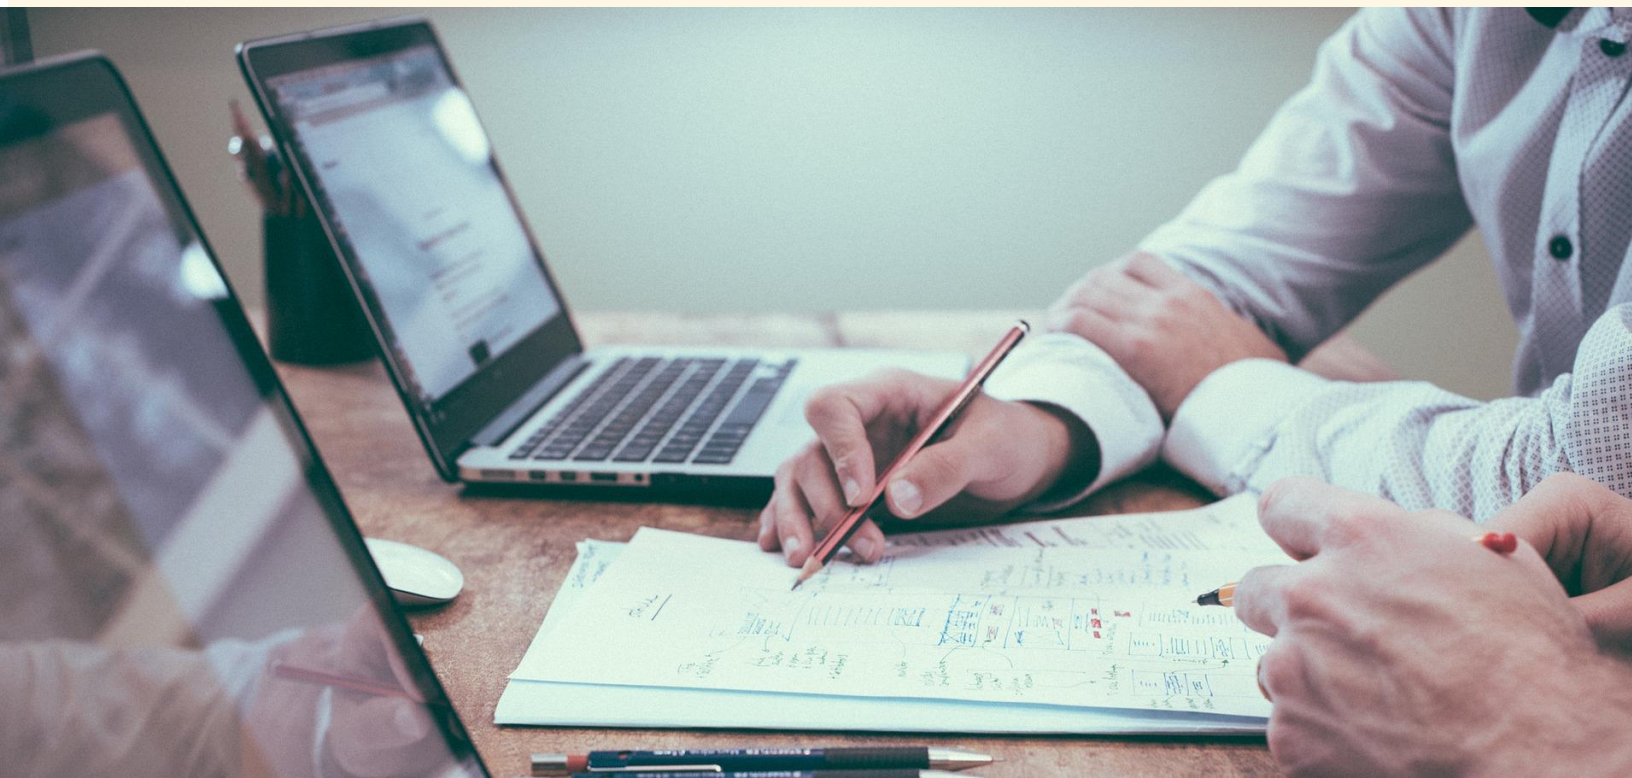

From the beginning, Stentorian Technologies had the goal of redefining manufacturing software and service from bottom to top. That is why our tools were designed around the idea that they should be powerful, yet simple to use, from the very first day.

Our software was built to make importing our clients' information easy and straightforward. Then we make it even easier, because your onboarding team will do most of the hard work for you.

## Your Experience

Making your experience with our software a delight, is our primary goal. Our stepped onboarding process will have you using the software in a matter of days – yes *days*. Then, we will be there with you as you grow into the software, gradually helping you grow into the full use of your powerful new tools. You will be able to see tangible value from these tools in an unbelievably short time.

You will be amazed. That is our goal and our promise to you.

## **SIMPLE ONBOARDING STEPS**

### **Step 1 START**

- Company Creation
- Data Import (Current Information)
- Company/Admin Setup

### **Step 2 DESIGN/INFRASTRUCTURE**

- Review Current Process
- Create New Process (Template Base)
- Design logistics for process controls

### **Step 3 PROCESS MANAGEMENT**

- Run Multiple “Jobs” through Processes
- Create and Adjust Processes
- Setup Workstations

### **Step 4 DOCUMENT CONTROLS**

- Create and Place Documentation
- Create/Modify Electronic Traveler
- Run “Jobs” with Documents through Processes

### **Step 5 PRODUCT INFORMATION**

- Top Level Product Information Input
- Top Level Product Tied to Workflow Processes
- Top Level Product Tied to Document Repository

### **Step 6 DETAIL PRODUCT INFORMATION**

- Detailed Level Product Information Input
- Detailed Level Product Tied to Workflow Processes
- Detailed Level Product Tied to Document Repository

### **Step 7 INVENTORY AND MATERIALS**

- Location and Facility Setup
- Supply Chain Setup
- Creation of Lots and Batches

### **Step 8 SALES AND BID TOOLS**

- Sales Bids/Order Creation and Management
- Margin and Markup Controls
- Shipment and Invoice Setups

### **Step 9 CYCLE COUNTS**

- Main Parts Cycle Counts
- Secondary Part Cycle Counts
- Remaining Part Cycle Counts

### **Step 10 MACHINE MAINTENANCE**

- Create Machine Inventory
- Create Machine Maintenance Workflows
- Manage Tool and Machine Inventory

### **Step 11 CALIBRATION**

- Review from Baseline
- Review Histories and Cost Summaries
- Create Reports
